In Lethbridge, we have one of the most unique climates in the world with drastic temperature changes that can occur in just a matter of hours, as well as strong chinook winds. The difference between a good asphalt roof and one that leaks or blows away is in the hands of the applicator.

That's where Waterproofing Roofing comes into the picture. Our specialists know what methods and materials really can handle the needs of Southern Alberta's property owners.

Every roof has a unique combination of components requiring a specific solution. Our specialists provide solutions to meet each customer's roofing situation, and are available for consultation to leverage our industry experience for the benefit of our customers.

Our business goal is to give our clients the best service we know how. We approach every job with a professional attitude and appearance. We do what we say we are going to do, and we show up. When we finish a job, we always follow-up with our customer. We grade the quality of the work, and ascertain our customer's satisfaction for a job well done. Our aim is to 'wow' our customers from beginning to end in their roofing experience. A satisfied customer is the best advertising we can have.
